

## **Press Release**

**SURCO Limited**

### **XCES 2010 – Exhibition for Construction and Engineering Surveying**

Following on from the success of the first XCES exhibition in March 2009, SURCO Limited, the information business of the Chartered Institution of Civil Engineering Surveyors, presents XCES 2010. XCES will again follow its established theme of being informative, educational and entertaining for all those who exhibit and attend. It will also be the first exhibition held to support the activities of the newly chartered institution.

Products showcased at XCES 2009 included; measurement, mapping, modelling, machine control, GIS, GNSS, laser scanning, data collection, CAD, terrain modelling, visualisation, underground detection, photogrammetry, aerial imagery, education and training....

This year, we aim to bring together the industry's commercial and geospatial professions by featuring additional products and services, such as; project management software, bills of quantities, estimating, contract management, cost control, planning and programming, electronic document handling and monitoring which will be of interest to commercial managers, quantity surveyors, project managers, estimators, cost engineers and anyone who is involved with the measurement and monitoring of objects, space, quantities and costs within the built environment.

An educational zone will also be in place throughout the afternoon on 3 March which will provide the exhibitors an opportunity to demonstrate and provide activities and hands on experience of the latest equipment and software to the next generation of surveyors.

XCES will be staged at one of the top event venues in the south east, Sandown Park Racecourse, on 2 and 3 March 2010.

A huge number of visitors are expected at XCES, where they will be offered the chance to attend different workshops enabling exhibitors the opportunity to further promote their products and services.

An evening dinner has also been arranged during XCES. The evening will join colleagues together for a night of socialising with fine dining and top class entertainment.

Further information is available at [www.surco.uk.com](http://www.surco.uk.com) and XCES will be promoted in *Civil Engineering Surveyor*, the monthly journal for the members of ICES, and other leading industry publications over the coming months.

**Notes**

SURCO Limited is the information business of the Chartered Institution of Civil Engineering Surveyors (ICES) and is responsible for its commercial activities.

SURCO was established in 1992 when ICES became an educational charity.

SURCO supports the education and training aspects of ICES membership and offers specialist tutor training for surveyors working within civil engineering. SURCO Training can arrange for courses to be delivered either in-house or externally. Further information and a full course list can be found at <http://www.surco.uk.com/training.php>

SURCO also publishes the institution's journal, *Civil Engineering Surveyor*, as well as annual supplements on electronic surveying, construction law and GIS/GPS.
